Forensic Audit Report

Enhanced Regulatory Compliance Assessment

Includes: Legal text mapping, compliance checks, failure analysis, remediation guidance

Organization:	Seed Enterprise (RBAC Tenant)
Organization ID:	cccc1111-0000-0000-0000-000000000001
Generated:	2026-06-05 03:19:50 UTC
MGI Score:	333 (Critical)
Framework:	GDPR (General Data Protection Regulation)

Executive Summary

Compliance Overview

Of 16 GDPR articles mapped, 9 have been assessed (56% coverage).

7 Compliant

2 Partial

0 Gaps

7 Pending Assessment

Controls & Monitoring Summary

For audit/legal purposes: Evidence of controls in place, monitoring scope, and data integrity.

Control Area	Status	Coverage	Details
Continuous Monitoring	Active	4 AI agents	All registered agents monitored 24/7 for policy violations and anomalies
Cryptographic Signing	Enforced	91 actions signed	All AI decisions cryptographically signed with ML-DSA-44 (post-quantum secure)
Policy Enforcement	Active	62 active policies	Guardrails and constraints applied to agent actions in real-time
Human-in-the-Loop	Configured	High-risk decisions	Mandatory human approval for actions exceeding risk thresholds
Anomaly Detection	Active	All agent traffic	ML-based detection of unusual patterns, drift, and potential breaches
Evidence Retention	Compliant	7 years minimum	Immutable audit trail with tamper-evident hash chaining

Chain of Custody Statement

All evidence in this report is derived from cryptographically signed audit logs maintained by MOSS. Each record is hash-chained to its predecessor, ensuring tamper-evident storage. The integrity of this evidence can be independently verified using the ML-DSA-44 signatures. Evidence retention exceeds GDPR Article 5(1)(e) requirements with a minimum 7-year retention period.

GDPR Article-by-Article Summary

Article	Requirement	Status
Article 5	Principles relating to processing	Partial
Article 6	Lawfulness of processing	Not Assessed
Article 7	Conditions for consent	Not Assessed
Article 13	Information to be provided	Not Assessed
Article 15	Right of access	Compliant
Article 17	Right to erasure	Compliant
Article 22	Automated decision-making	Partial
Article 25	Data protection by design	Not Assessed
Article 30	Records of processing activities	Compliant
Article 32	Security of processing	Compliant
Article 33	Breach notification	Compliant
Article 35	Data protection impact assessment	Compliant
Article 37	Designation of DPO	Not Assessed
Article 44	International transfers	Not Assessed
Article 46	Appropriate safeguards	Not Assessed
Article 83	Administrative fines	Compliant

Detailed Article Analysis

Each section includes the exact legal requirement, MOSS compliance checks, identified issues, and remediation guidance.

Article 5: Principles relating to processing

⚠️ Partial Compliance

Automated monitoring

Legal Requirement: Personal data shall be processed lawfully, fairly and in a transparent manner; collected for specified, explicit and legitimate purposes; adequate, relevant and limited to what is necessary; accurate and kept up to date; kept no longer than necessary; processed in a manner ensuring security.

MOSS Compliance Checks:

- ○ All agent actions are logged with ML-DSA-44 signatures
- ○ Data retention policies are enforced automatically
- ○ Agent purpose declarations match actual data access

Evidence Records:

- type: audit_logs
- count: 91
- type: policies
- count: 62
- type: note
- value: MOSS provides audit trail and policy enforcement. Purpose declarations pending.

Potential Issues:

- Agent accessing data outside declared purpose
- Missing audit trail for data processing actions
- Data retained beyond specified retention period

Remediation:

Enable comprehensive audit logging, define clear purpose declarations for each agent, configure retention policies

Article 6: Lawfulness of processing

☐ Not Yet Assessed

Manual assessment required

Legal Requirement: Processing shall be lawful only if: (a) consent; (b) contract necessity; (c) legal obligation; (d) vital interests; (e) public interest; (f) legitimate interests.

MOSS Compliance Checks:

- ☐ Each agent has declared legal basis for processing
- ☐ Consent records maintained where applicable

Evidence Records:

- type: note
- value: Legal basis documentation not yet configured.

Potential Issues:

- No legal basis declared for agent processing activities
- Consent not obtained for consent-based processing
- Legitimate interest assessment missing

Remediation:

Document legal basis for each agent in agent registry, implement consent management, conduct LIA where required

Article 7: Conditions for consent

☐ Not Yet Assessed

Manual assessment required

Legal Requirement: Controller must demonstrate consent was given. Consent request must be distinguishable, intelligible, easily accessible. Data subject may withdraw consent at any time.

MOSS Compliance Checks:

- ☐ Consent records include timestamp and scope
- ☐ Withdrawal mechanism is operational

Evidence Records:

- type: note
- value: Consent management not yet configured.

Potential Issues:

- Consent records lack granularity or timestamp
- No mechanism for consent withdrawal
- Continued processing after consent withdrawal

Remediation:

Implement granular consent tracking, ensure withdrawal mechanism triggers processing halt

Article 13: Information to be provided

○ Not Yet Assessed

Manual assessment required

Legal Requirement: Controller shall provide: identity, DPO contact, purposes, legal basis, recipients, transfer info, retention period, data subject rights, right to complain, automated decision-making info.

MOSS Compliance Checks:

- ○ Privacy notice published and accessible
- ○ Agent purposes disclosed to data subjects

Evidence Records:

- type: note
- value: Privacy notices not yet documented.

Potential Issues:

- Privacy notice missing required elements
- AI/agent processing not disclosed
- Automated decision-making not explained

Remediation:

Update privacy notice to include AI agent processing, document decision-making logic

Article 15: Right of access

✓ Compliant

Automated monitoring

Legal Requirement: Data subject has right to obtain confirmation of processing, access to personal data, and information about purposes, categories, recipients, retention, rights, source, and automated decision-making.

MOSS Compliance Checks:

- ✓ Data export capability exists for all agent-processed data
- ✓ Access requests can be fulfilled within 30 days

✓ **No action required.** MOSS evidence confirms compliance with this article.

Evidence Records:

- type: data_export
- count: 91
- note: All agent-processed data logged and exportable

Article 17: Right to erasure

✓ **Compliant**

Automated monitoring

Legal Requirement: Data subject has right to obtain erasure when: data no longer necessary; consent withdrawn; unlawful processing; legal obligation. Must notify recipients of erasure.

MOSS Compliance Checks:

- ✓ Erasure requests trigger deletion across all agent data stores
- ✓ Deletion is cryptographically verified

✓ **No action required.** MOSS evidence confirms compliance with this article.

Evidence Records:

- type: note
- value: Erasure capability configured. No requests received yet.

Article 22: Automated decision-making

⚠️ **Partial Compliance**

Automated monitoring

Legal Requirement: Data subject has right not to be subject to solely automated decision-making with legal or significant effects. Exceptions require explicit consent, contract necessity, or law. Must implement safeguards including human intervention.

MOSS Compliance Checks:

- ○ High-impact decisions require human approval (HITL)
- ○ Decision reasoning is logged and explainable
- ○ Human override mechanism exists and is used

Evidence Records:

- type: hitl_approvals
- count: 0
- type: explanation
- note: Human oversight mechanism configured. No high-risk decisions required intervention this period.

Potential Issues:

- High-impact decisions made without human review
- No explainability for automated decisions
- Human override mechanism not functional
- HITL approval rate below policy threshold

Remediation:

Configure HITL policies for high-risk decisions, enable explainability logging, test override mechanism

Article 25: Data protection by design

☐ Not Yet Assessed

Manual assessment required

Legal Requirement: Controller shall implement technical and organizational measures to implement data protection principles. Only necessary data shall be processed by default (data minimization by design).

MOSS Compliance Checks:

- ☐ Privacy-preserving techniques documented
- ☐ Data minimization enforced at agent level

Evidence Records:

- type: note
- value: Privacy by design reviews not yet documented.

Potential Issues:

- Agents access more data than necessary
- No privacy impact assessment for new agents
- Default configurations expose unnecessary data

Remediation:

Conduct architecture review, implement field-level access controls, enforce least-privilege by default

Article 30: Records of processing activities

✓ **Compliant**

Automated monitoring

Legal Requirement: Controller shall maintain records of: name/contact, purposes, categories of data subjects and data, recipients, transfers, retention, security measures. Records shall be in writing and available to supervisory authority.

MOSS Compliance Checks:

✓ **No action required.** MOSS evidence confirms compliance with this article.

- ✓ All agents registered with purpose and data categories
- ✓ Processing activities logged with cryptographic signatures
- ✓ Records exportable for supervisory authority

Evidence Records:

- type: audit_trail
- count: 91
- note: Cryptographically signed records of all AI processing activities

Article 32: Security of processing

✓ **Compliant**

Automated monitoring

Legal Requirement: Controller shall implement: pseudonymization and encryption; confidentiality, integrity, availability; ability to restore; regular testing. Security appropriate to risk.

MOSS Compliance Checks:

✓ **No action required.** MOSS evidence confirms compliance with this article.

- ✓ All agent communications use ML-DSA-44 signatures
- ✓ Data at rest is encrypted
- ✓ Access controls enforced per agent

Evidence Records:

- type: ml_dsa_signatures
- count: 91
- note: Post-quantum cryptographic signatures on all actions

Article 33: Breach notification

✓ **Compliant**

Automated monitoring

Legal Requirement: Controller shall notify supervisory authority within 72 hours of becoming aware of breach. Notification must describe: nature, categories/numbers, DPO contact, consequences, mitigation measures.

MOSS Compliance Checks:

- ✓ Anomaly detection enabled for agent behavior
- ✓ Incident response workflow configured
- ✓ 72-hour notification capability verified

✓ **No action required.** MOSS evidence confirms compliance with this article.

Evidence Records:

- type: anomaly_detection
- incidents: 0
- note: Continuous monitoring for breach indicators

Article 35: Data protection impact assessment

✓ **Compliant**

Manual assessment required

Legal Requirement: DPIA required when processing likely to result in high risk: systematic evaluation, large-scale special categories, systematic monitoring. Must assess necessity, proportionality, risks, and safeguards.

MOSS Compliance Checks:

- ✓ DPIA completed for high-risk agents
- ✓ DPIA reviewed and approved by DPO
- ✓ Mitigations implemented as specified

✓ **No action required.** MOSS evidence confirms compliance with this article.

Evidence Records:

- type: external_evidence
- title: OrgA DPIA Report
- file_name: orga-dpia-report.pdf
- type: file_hash
- value:
111111111111111111111111111111111111...
- type: moss_signature
- value: fixture-signature-orga...
- type: note
- value: External documentation uploaded 2026-06-05. Cryptographically signed by MOSS.
- type: validity
- valid_until: 2027-01-01

Article 37: Designation of DPO

☐ Not Yet Assessed

Manual assessment required

Legal Requirement: Controller shall designate DPO when: public authority; core activities require regular monitoring; core activities involve large-scale special categories.

MOSS Compliance Checks:

- ☐ DPO designated and contact published
- ☐ DPO involved in AI governance decisions

Evidence Records:

- type: note
- value: DPO designation tracking not configured.

Potential Issues:

- No DPO designated when required
- DPO not involved in agent deployment decisions
- DPO contact not published

Remediation:

Designate DPO if required, ensure DPO reviews agent deployments, publish contact details

Article 44: International transfers

☐ Not Yet Assessed

Manual assessment required

Legal Requirement: Transfer to third country only if: adequacy decision; appropriate safeguards (BCRs, SCCs, certification); derogations for specific situations.

MOSS Compliance Checks:

- ☐ Agent data transfers mapped
- ☐ Transfer mechanism documented for each destination

Evidence Records:

- type: note
- value: Data transfer documentation not yet configured.

Potential Issues:

- Data transferred to third country without safeguards
- Transfer impact assessment not completed
- Invalid or expired SCCs

Remediation:

Map all agent data flows, implement SCCs or other safeguards, conduct transfer impact assessments

Article 46: Appropriate safeguards

○ Not Yet Assessed

Manual assessment required

Legal Requirement: Appropriate safeguards may include: legally binding instrument; BCRs; SCCs; approved code of conduct; approved certification mechanism.

MOSS Compliance Checks:

- ○ Safeguards in place for all third-country transfers
- ○ Safeguards legally valid and current

Evidence Records:

- type: note
- value: Transfer safeguard documentation not yet configured.

Potential Issues:

- Expired or invalid transfer safeguards
- No safeguards for new transfer destinations

Remediation:

Review and update transfer safeguards, implement BCRs if applicable

Article 83: Administrative fines

✓ Compliant

Automated monitoring

Legal Requirement: Fines up to €20M or 4% global turnover for violations. Factors: nature, gravity, duration; intentional/negligent; mitigation; history; cooperation; categories affected; notification; certification.

MOSS Compliance Checks:

- ✓ No outstanding violations
- ✓ MGI score above compliance threshold
- ✓ Remediation evidence documented

✓ **No action required.** MOSS evidence confirms compliance with this article.

Evidence Records:

- type: violation_history
- count: 0
- note: Clean compliance record
- type: compliance_evidence
- count: 91
- note: Full audit trail demonstrates compliance efforts

Cryptographic Attestation

Content Fingerprint (SHA-256):

```
fef35761dc8fc07edc727cf1a8cb39bfcf2884bcf9a21b3c6e4aa18427baac88
```

Integrity Guarantee: The SHA-256 digest above covers all report content. It is a content fingerprint only – the post-quantum ML-DSA-44 signature is rendered separately in the next section.

Cryptographic Signature (ML-DSA-44)

This section contains a real post-quantum signature over the canonical report payload. It is distinct from the SHA-256 Content Fingerprint shown above. Verify the signature by fetching the public key at [/.well-known/moss-keys/moss_prod_2026_Q1](#) and running an ML-DSA-44 verify (FIPS 204) against the canonical payload.

Algorithm: ML-DSA-44 (FIPS 204)

Signing Key ID: `moss_prod_2026_Q1`

Signed Payload (canonical):

```
{"algorithm": "ML-DSA-44", "content_sha256": "fef35761dc8fc07edc727cf1a8cb39bfcf2884bcf9a21b3c6e4aa18427baac88", "frameworks": ["GDPR"], "generated_at": "2026-06-05T03:19:50.855077+00:00", "mgi_score": 333, "org_id": "cccc1111-0000-0000-0000-000000000001", "report_id": "FOR-20260605031950"}
```

Signature (hex, 2420 bytes):

```
